

§ 86.102 How did the Service design the National Framework?

The Framework divides the survey into two components: boater survey, and boat access provider survey.

(a) The purpose of the boater survey component is to identify boat user preferences and concerns for existing and needed access available to the public.

(1) The nontrailerable boat data set will fulfill informational needs for you to develop your State program plans as called for in the Act.

(2) The boater survey will survey registered boat owners in your State for two types of boats:

(i) Part A—for nontrailerable recreational vessels.

(ii) Part B—for trailerable and “car-top” boats (less than 26 feet long).

(b) The purpose of the boat access provider component is to identify boat access providers’ ideas about current and needed facility and site locations and perceptions of boat user preferences and concerns regarding access. We developed these questions to guide interviews of boat access facility and site managers.

(1) The nontrailerable boat data set will fulfill the informational needs for you to develop your State plans as called for in the Act.

(2) The boat access provider survey will survey facility providers in your State for two types of boats:

(i) Part C—a survey to all providers in your State who allow public access, including State agency and non-State entities (Federal and local government entities, corporate and private/commercial providers), and operate tie-up facilities for nontrailerable recreational vessels.

(ii) Part D—a survey to all providers in your State who allow public access and operate boat access sites for boats less than 26 feet long.

Subpart K—How States Will Complete Access Needs Surveys**§ 86.110 What does the State survey do?**

The State survey determines the status of boating access facilities for all recreational boats in your State and your future boater access needs.

§ 86.111 Must I do a survey?

The Act does not require surveys. They are voluntary. However, if you do a survey, you must complete it following the National Framework to receive funds. You must transmit the results to the Service Regional Offices in a common electronic format, such as Microsoft Word, Word Perfect, Excel or Quattro Pro.

§ 86.112 What are the advantages of doing a survey?

Surveys provide the information necessary to fully understand the needs of boaters in your State. Surveys allow you to develop a meaningful plan to provide better access to boaters. Use surveys to complete the plan.

§ 86.113 What if I have recently completed a boat access survey?

If the recent survey substantially answers the provisions in § 86.118, the appropriate Service Regional Office will determine if it is sufficient to meet the needs of the program. If the Regional Office determines that the survey is not sufficient, you must complete that portion(s) or an entire new survey to receive credit for completing a recent survey.

§ 86.114 Do I need to conduct a survey if I already have a plan for installing tie-up facilities?

You need not conduct the survey if the appropriate Secretary of the Interior certifies that you have developed and are carrying out a State program plan, as described in Subpart M of this chapter, that ensures that public boat access exists and is adequate to meet the needs of recreational boaters on your waters.

§ 86.115 How should I administer the survey?

Use a consultant or university specializing in administration of such surveys. Use sample sizes large enough to achieve statistical accuracy so the estimate is within plus or minus 10 percent of the true number.

(a) You may use a telephone, mail, or other type of survey for a sample population of boaters within the State. Costs for telephone and mail surveys are roughly similar. However, response
